PROFESSIONAL SUMMARY

Second-year Computer Science student (AI & ML) with practical experience building machine learning models, computer vision pipelines, and automation workflows. Seeking an internship to apply these skills in a professional environment.

EDUCATION

D.Y. Patil College of Engineering and Technology (DYPCET) — Kolhapur, Maharashtra
B.Tech in Computer Science and Engineering (AI & ML) | Expected graduation: 2028

TECHNICAL SKILLS

AI, ML & Computer Vision: TensorFlow, Scikit-Learn, LSTM time-series forecasting, COCO-SSD, real-time object detection, agentic AI architectures

Spatial Computing & 3D: WebAR, Three.js, AR.js, markerless tracking systems

Backend & Automation: n8n, OAuth 2.0, RESTful APIs, multi-agent systems, webhook integrations

Programming Languages: Python, JavaScript, C++, SQL

Cloud Certifications: Oracle Cloud Infrastructure 2025 – Foundations Associate; Oracle Cloud Infrastructure 2025 – AI Foundations Associate; Oracle Fusion AI Agent Studio – Foundations Associate

PROJECTS

Algorithmic Market Predictor | *Quantitative AI Forecasting*

- Built an ML pipeline using LSTM/RNN architectures to forecast stock price trends and volatility.
- Implemented automated data ingestion to process historical financial data and market sentiment indicators.

Eco-Kavach | *WebAR & Computer Vision*

- Built a markerless WebAR system using the COCO-SSD model for real-time object detection in a browser environment.
- Developed a Three.js rendering layer that overlays carbon footprint and recycling data onto detected objects without QR codes.

Study Buddy | *AI Scheduling Agent*

- Built an AI-powered scheduling tool that integrates with Google Calendar via OAuth 2.0 to help manage academic and personal tasks.
- Implemented logic to automatically adjust and prioritise tasks based on deadlines and user workload.

Intelligent Research & Analytics Bot | *Automation & Orchestration*

- Built a Telegram-accessible research assistant using n8n for multi-step workflow orchestration.
- Automated data retrieval pipelines to deliver summaries on academic papers and financial market updates.

ACHIEVEMENTS & AWARDS

2nd Place – IDEA-TO-IMPACT Hackathon

Placed second for developing a cloud-connected edge-AI environmental monitoring system aimed at sustainable risk reduction.

Smart India Hackathon (SIH) – Internal Selection Qualifier

Cleared the internal college selection round for SIH, validating the technical feasibility of the proposed problem statement.

Finalist – Pioneer Business Problems and Solutions

Reached the finals by pitching technology-based solutions to real business challenges.
